We are looking for a world class **Lead Unity3D Developer** to lead the team of talented developers and help develop the next generation of mobile social games! We are looking for fun, energetic people who have a passion for building great products and bringing our games to life. So, if you think you have the chops to deliver something unique, come join us!

Responsibilities

- Manage & lead a team of developers and work with the Producer to achieve results.
- Manage sprints and daily scrum with the Producer.
- Manage project end to end from idea to design to launch.
- Mentor and train junior developers.
- Inspire technical solutions while spearheading multiple games.

- Review code and design decisions with teammates and propose changes and improvements to promote scalable, reliable, and maintainable technologies for our gaming platforms.
- Promote code maintainability, extensibility, and reusability across all mobile devices.
- Provide feedback to help shape the final product of our games in terms of gameplay and user experience.
- Monitor the technical performance of games including server code performance, server-client communication issues, bugs, and crashes.

Requirements

- Bachelors in Computer Science or equivalent quantitative field.
- 5+ years of experience in game development and Unity 3D (C#).
- 3+ mobile titles shipped.
- Ability to solve complex problems with simple and optimal solutions.
- Strong empathy for users.
- Love and passion for mobile games.
- Ability to lead and manage a team of developers.
- Ability to adapt to different game genres.
- Ability to create quick prototypes as per instructions.
- Ability to learn different technologies and programming languages quickly.
- Excellent written and verbal communication skills.
